

# **Computer Groups**

## **Offering a New Concept in Expanding your Computing Know How**

We conduct informal, relaxed, group meetings. The sessions will cover all subjects relating to computing, from the very basics to more advanced programs.

Each group will be unique and will dictate their own pace and topics.

We have been conducting two groups for over 5 years and they continue to be very successful.

We would like to expand this concept by forming new groups. A minimum of six members are required to form a group at a cost of €4 per person per session.

### Just a few of the topics that can be covered:

- All aspects of emailing and surfing the Internet.
- All Microsoft programs
- Digital photography, managing your photos, slide shows, web albums.
- Skype, social networking, eBay.
- Security, maintenance & file management.
- Downloading music, creating CDs & DVDs.

We come with our own digital projector and laptop.

It's just like going to a movie

Only you have to provide the Popcorn!

**Tune in to listen to us the first Monday of every month**

**on**

**REM.FM on 104.8**

**And monthly on Mijas TV 340**
